

Katie Kuhl

Katie is a learning and development professional with experience in classroom facilitation, content assessment and development, organizational development, leadership, and business process strategy. In the words of Cammy Bean, Katie is “an Accidental Instructional Designer”, with an educational background in Biology that ultimately led to talent development instead of beakers and genetic sequences.

Starting as a Teaching Assistant for her Human Physiology professor at the University of Nebraska-Lincoln, Katie found her passion for learning by working to identify gaps in the current delivery of information methods and then strategically reformed how her students learned through more visual and hands-on approaches. Currently, she is in her 10th year at Medical Solutions – a company focused on staffing quality healthcare in a travel capacity – and serves as the Learning Experience (Training Department) Manager.

In her role she leads a team of Learning Experience Designers (eIDs) and Specialists with the purpose of helping their organization grow through professional development opportunities all while aligning training objectives with company strategic goals. Her focus is on the design, development, and production of innovative and engaging training content that incorporates mixed media using a working knowledge of instructional design and learning methodologies.

Katie is an active member of ATD Nebraska and is currently serving in her 4th year on the Board of Directors as the President Elect.
